

# Yarn Web Activity/Business Management

**Supplies needed:** Large ball of yarn

Students

**Activity:** The teacher will give a student a large ball of yarn. The teacher will explain to the students the directions.

**Directions:** The first student holding the ball of yarn will list a management responsibility. Then explain to the rest of the class how they have used this management responsibility or seen it used in their life time. After, the first student has described their management responsibility; they will hold the end of the yarn with one hand and toss the ball of yarn with the other, to the next student. The next student will catch the ball of yarn, answer the question, then hold yarn strand in one hand and throw the ball of yarn with the other hand, to the next student. The above directions will be followed thoroughly, until all the students have answered the question and are holding a strand of yarn. The last student holding the ball of yarn will keep their part of the yarn strand with one hand and toss the ball of yarn to the teacher.

**Follow-up:** The teacher will explain to the students that using this ball of yarn connects us all like a web by sharing your management responsibility and a life experience.
